Oakland, CA 94608

## EXPERIENCE

### MONDO IS PHAT

- Available on the Android store.
- Created and launched under the challenge of learning a new framework in one week with Phaser, Javascript, HTML, CSS, IntelXDK and Cordova.
- Rapid user-research before and after alpha-launch.
- Wireframes, user-personas, thumbnails, splash pages and icons created using Sketch.

### BREAKR

- Primarily responsible for the front-end design in this full-stack app.
- Built as part of a distributed team using React, Redux, Node, Express and MongoDB.

### RESPONSIBILIPUPPY

- Front-end game created using React, Redux and SVG Animations.

### UX/UI APPRENTICE

Chaos Frolic  
Oakland, CA  
January 2015-July 2016

- Wireframes, sticker designs and logo designs helped win over difficult stakeholders and raise first round of funding.
- User personas helped developer empathize and focus on user goals.
- Identified usability and data-visualization issues through testing.
- UI and level design for 2D and 3D game-play in Unity.

### BUSINESS DEVELOPMENT COORDINATOR

Griddig, Inc.  
San Francisco, CA  
May-September 2014

- Researched and communicated with seed-funding companies to raise funding for startup.
- Wrote advertisements for Vertical Response and other email campaigns.
- Identified usability issues through testing and Google Analytics.
